

```
integral_constant< std::size_t, mage::SRGBA::s_size >
```

```
std::tuple_size< mage::SRGBA >
```

A vertical arrow points from the `std::size_t` type in the `std::tuple_size` template to the `std::size_t` type in the `integral_constant` template, indicating that `std::tuple_size` inherits from `integral_constant`.
